Project Experience:

Zest India IT Services

Role: Senior Software Engineer

Duration: Dec 2022 – Present

Project: Performance Accessories (Current)

Client: Mohawk Group

Duration: Jan 2024 – Present

Description: Performance Accessories is an online platform offering high-quality flooring accessories such as trims, moldings, and underlayment. The project aims to enhance user experience and improve the product catalog using Bloomreach Experience Manager.

Responsibilities:

- Implementing dynamic content management using Bloomreach Experience Manager.
- Developing and enhancing front-end features to improve user interaction.
- Integrating responsive design across multiple devices and platforms.
- Collaborating with the design and backend teams to ensure seamless integration of new features.
- Optimizing product search and navigation for a better customer experience.
- Using GIT for version control and JIRA for tracking project progress and resolving issues.

Environment: Angular, Bloomreach Experience Manager, HTML5, CSS, JavaScript, Typescript, GIT, JIRA.

Project: Mohawk Build

Client: Mohawk Group

Duration: Jul 2023 – Jan 2024

Description: Mohawk Build is an e-commerce platform designed to support building professionals by providing flooring products, services, and solutions. The platform offers an extensive catalog of building materials, with features focused on ease of navigation and product selection.

Responsibilities:

- Led the implementation of dynamic content management using Bloomreach Experience Manager.
- Developed responsive front-end architecture to enhance user experience across devices.
- Collaborated closely with the backend team to streamline data integration.
- Improved product search functionality and optimized performance for better customer engagement.
- Managed the front-end architecture, ensuring scalability and future expansion.
- Used BitBucket for version control and JIRA for tracking issues and managing project milestones.

Environment: Angular, Bloomreach Experience Manager, HTML5, CSS, JavaScript, Typescript, BitBucket, JIRA.

Project: iVServe

Client: iVServe Technologies

Duration: Jan 2023 – Jun 2023

Description: iVServe helps businesses customize and implement Salesforce solutions to meet specific needs.

Responsibilities:

- Analyzed client requirements and developed solutions accordingly.
- Successfully executed SEO tasks to improve online visibility.
- Built a front-end module for Trip Analysis with a user-friendly interface.
- Communicated daily with the client to address priorities and ensure smooth execution.
- Designed screens and layouts based on project requirements.
- Utilized GIT for version control and JIRA for efficient issue tracking and project management.
- Provided ongoing support and maintenance for the application.

Environment: Angular, HTML5, CSS, JavaScript, JSON, GIT, JIRA, Typescript, Bootstrap, Visual Studio Code, UI/UX Design.

Senwell Solutions

Role: Software Engineer

Duration: Nov 2021 – Dec 2022.

Project: Lotto Social

Client: Hatchster

Duration: Nov 2021 – Jun 2022

Description: Lotto Social is a lottery management system enabling users to participate in lotteries and manage syndicates.

Responsibilities:

- Involved in sprint planning, story pointing, and design discussions.
- Developed reusable custom components and translated Figma designs into pixel-perfect UI.
- Worked on enhancing applications within the SDLC, and assisted in analyzing production issues.
- Provided weekly/monthly project status reports, employing GIT for version control and JIRA for defect tracking.

Environment: Angular, React, Node.JS, Figma, GIT, JIRA, Microsoft SQL Server, MongoDB, HTML5, Clickup, CSS, JavaScript, Typescript.

Project: Lumiere32

Client: Lumiere32, Singapore

Duration: Jun 2022 – Dec 2022

Description: Lumiere32 is a medical supplies marketplace connecting manufacturers, dealers, and clinicians.

Responsibilities:

- Analyzed and gathered client requirements.
- Collaborated with designers to create wire-frames and new feature designs.
- Worked on performance improvements and collaborated with developers for feature design.
- Troubleshoot defects, deployed the platform to production, and monitored its performance.

Environment: Angular, MySQL, MongoDB, HTML5, CSS, JavaScript, JSON, Typescript, Bootstrap, Visual Studio.NET.
